FUTURES

Index to Volume 5

No 1 February 1973
No 2 April 1973
No 3 June 1973
No 4 August 1973
No 5 October 1973
No 6 December 1973

Agricultural sub-system—The. *Pauline K. Marstrand and K. L. R. Pavitt.* **5.1**, 56–65
Agriculture in Europe 2000. *Anton J. Jansen and Steven Faith.* **5.5**, 438–448.
Applied futures research in France: some critical views. *Bernard Cazes.* **5.3**, 272–280
Assessment of travel/communications substitutability—An. *Lawrence H. Day.* **5.6**, 559–572

Capital and industrial output sub-system—The. *P.-A. Julien, Christopher Freeman and C. H. Cooper.* **5.1**, 66–79
Changing pattern of futures research in the USA—The. *John McHale.* **5.3**, 257–271
Czechoslovakia—Futures research in. *Ota Šulc.* **5.6**, 573–579

Delphi/cross-impact technique—Suggested improvements to the. (Methodology.) *John Stover.* **5.3**, 308–313
Delphi in the assessment of R & D projects. *J.-C. Derian and Françoise Morize.* **5.5**, 469–483
Delphi—Plato and. *Gordon Welty.* **5.3**, 281–286
Development of a pattern model for social forecasting—The. *Gary Gappert.* **5.4**, 367–382

Energy resources. *A. J. Surrey and A. J. Bromley.* **5.1**, 90–107
Environmentalism. *T. C. Sinclair.* **5.2**, 195–211
Europe 2000—Agriculture in. *Anton J. Jansen and Steven Faith.* **5.5**, 438–448
Europe 2000: progress of a research project—Urban. *Peter Hall.* **5.5**, 449–456
Evaluation of the world models—The. *H. S. D. Cole and R. C. Curnow.* **5.1**, 108–134

Fourier bicentenary—The. (Futures essay.) *I. F. Clarke.* **5.2**, 244–247
France—Applied futures research in: some critical views. *Bernard Cazes.* **5.3**, 272–280
Future as information—The. *Nicholas Henry.* **5.4**, 392–400
Future of the motorcar—The: alternative scenarios. *Geurt Hupkes.* **5.5**, 457–468
Futures research in Czechoslovakia. *Ota Šulc.* **5.6**, 573–579
Futures studies and management development. *Yehezkel Dror.* **5.6**, 536–542

Industry and the environment. *E. P. Hawthorne.* **5.3**, 297–302
Integrating town and country to conserve resources. (Alternative Futures.) *J. K. Page.* **5.4**, 401–406
Interactive decision stratum for the multilevel world model—An. *M. Mesarovic et al.* **5.4**, 357–366

Limitations as a methodological device. (Futures essay.) *Robert L. Decker.* **5.3**, 314–317
Look-out institution—Political implications of a. *Grover Starling.* **5.5**, 484–490

Malthus and other economists. *K. L. R. Pavitt.* **5.2**, 157–178
Malthus with a computer. *Christopher Freeman.* **5.1**, 5–13
Management development—Futures studies and. *Yehezkel Dror.* **5.6**, 536–542
Methodological device—Limitations as a. (Futures essay.) *Robert L. Decker.* **5.3**, 314–317
Motorcar—The future of the: alternative scenarios. *Geurt Hupkes.* **5.5**, 457–468
Multilevel world model—An interactive decision stratum for the. *M. Mesarovic et al.* **5.4**, 357–366

New logical model for futures research—A. *Magoroh Maruyama.* **5.5**, 435–437
New policy science paradigm—A. *Alexander N. Christakis.* **5.6**, 543–558
Non-renewable resources sub-system—The. *William Page.* **5.1**, 33–42

Overcrowding: a disease of social growth. *André Cournand and Michael Meyer.* **5.3**, 287–296

Plato and Delphi. *Gordon Welty.* **5.3**, 281–286
Policy science paradigm—A new. *Alexander N. Christakis.* **5.6**, 543–558
Political implications of a look-out institution. *Grover Starling.* **5.5**, 484–490
Pollution sub-system—The. *Pauline K. Marstrand and T. C. Sinclair.* **5.1**, 80–89
Population forecasting. *William Page.* **5.2**, 179–194
Population sub-system—The. *William Page.* **5.1**, 43–55
Postscript on social change. *Marie Jahoda.* **5.2**, 229–235
Prophets and Predictors. 6. Harrington's Oceana: or, the long arm of Utopia. *I. F. Clarke.* **5.3**, 317–322
Prophets and Predictors. 7. Turgot's philosophical review, or the idea of progress. *I. F. Clarke.* **5.4**, 407–412
Prophets and Predictors. 8. 1750–1850: the discovery of the future. *I. F. Clarke.* **5.5**, 494–499
Prophets and Predictors. 9. 1750–1850: the shape of the future. *I. F. Clarke.* **5.6**, 580–585

Reflections on social forecasting. *Georges Guéron.* **5.6**, 526–535
R & D projects—Delphi in the assessment of. *J.-C. Derian and Françoise Morize.* **5.5**, 469–483
Response to Sussex—A. *Dennis L. Meadows, Donella H. Meadows, Jørgen Randers and William W. Behrens III.* **5.1**, 135–152

Science fiction: mankind's early warning system. (Futures essay.) *George Hay.* **5.5**, 491–494
Selecting efficient forecasts. *G. Robert Franco.* **5.4**, 383–391
Social forecasting—Reflections on. *Georges Guéron.* **5.6**, 526–535
Social forecasting—The development of a pattern model for. *Gary Gappert.* **5.4**, 367–382
Social indicators and technology assessment. *Henry David.* **5.2**, 236–243

Structure of the world models—The. *H. S. D. Cole.* **5.1**, 14–32
Suggested improvements to the Delphi/cross-impact technique. (Methodology.) *John Stover.* **5.3**, 308–313
Sussex—A response to. *Dennis L. Meadows, Donella H. Meadows, Jørgen Randers and William W. Behrens III.* **5.1**, 135–152
System dynamics and technocracy. *Harvey Simmons.* **5.2**, 212–228
Technology assessment—Social indicators and. *Henry David.* **5.2**, 236–243
Travel/communications substitutability—An assessment of. *Lawrence H. Day.* **5.6**, 559–572
Trend extrapolation—A few kind words for. *James Bright*, **5.4**, 344–345
Urban Europe 2000: progress of a research project. *Peter Hall.* **5.5**, 449–456
Weighting for the future. (Methodology.) *William J. MacKinnon.* **5.3**, 303–308
Whither the mixed economy? *Geoffrey Vickers.* **5.4**, 346–356
